Objectives: The investment objective of this investment fund is to achieve an increase in value by investing in equities of innovative companies, without regional restrictions. Companies that have proven innovative strength qualify for stock selection. The following assessment criteria (not exhaustive) are used when selecting stocks: - Expenditures on research and development - Research collaborations - Patent applications - Innovation process management in the company The sub-fund will continuously invest at least 51% of its assets directly in equities. The proportion of equity-type securities and rights shall amount to 100% of the Fund's assets (after deduction of liquid funds). In this case, less than 10% of the Fund's assets may be invested in securities (including derivatives) of the same issuer. Currency risks from investments in equity-type securities and rights may be hedged against the Fund's reference currency. The sub-fund can therefore not invest more than 10% of its net asset value in UCITS or UCIs including ETFs. The Sub-Fund will not engage in securities lending and/or repurchase agreements (repo and/or reverse repo transactions) and will not invest in total return swaps. The Fund is a product in accordance with Article 8 of the European Disclosure Regulation 2019/2088. The currently implemented investment policy will be reported in the reports. Depending on the market situation, the net assets of the sub-fund may also be invested in all legally permissible assets in accordance with Section 4 of the General Section of the Prospectus.

Intended retail investor: In the member state of origin, the product is intended for professional and private investors with a long-term investment horizon, basic experience and who are able to bear a full financial loss. The product may be used for capital appreciation.

What are the risks and what could I get in return?

Risk Indicator:

Lower risk

Higher risk

The risk indicator assumes you keep the product until 6 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund are not able to pay you.

We have classified this product as 4 out of 7, which is a medium. This rates the potential losses from future performance at a medium level, and poor market conditions are very unlikely to impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Key Information Document

Performance-Scenarios:

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance over the last 11 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

This type of unfavorable scenario occurred for an investment between 24.09.2021 - 26.09.2022 (if you exit after 1 year), 09.11.2021 - 11.06.2024 (if you exit after 6 years).

This type of moderate scenario occurred for an investment between 29.04.2014 - 29.04.2015 (if you exit after 1 year), 16.01.2017 - 16.01.2023 (if you exit after 6 years).

This type of favorable scenario occurred for an investment between 23.03.2020 - 23.03.2021 (if you exit after 1 year), 09.02.2016 - 09.02.2022 (if you exit after 6 years).

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10'000 EUR Investment.

	If you exit after 1 year	If you exit after 6 years
Total costs	283 EUR	2'458 EUR
Annual cost impact (*)	2.8 %	2.8 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.1 % before costs and 6.2 % after costs.
